LINUX LAB ASSESSMENT 2

QUESTION 1

1. Student Information System script accepting Name, Roll No., Branch, Semester and marks in five subjects using variables; display a formatted report.

Opens the Nano text editor to create or edit the shell script named student.sh.

```
UBUNTU@Natashaa:~$ chmod +x student.sh
UBUNTU@Natashaa:~$ ./student.sh
Enter Student Name:
natasha
Enter Roll Number:
250160036
enter branch:
SOET
enter semester:
1rst
./student.sh: line 14: echoEnter marks in subject 1:: command not found
nano student.sh
Enter marks in subject 2:
30
Enter marks in subject 3:
40
Enter marks in subject 4:
50
Enter marks in subject 5:
60
```

- `chmod +x student.sh` — Gives the script execute permission.
- `./student.sh` — Executes the shell script from the current directory.

Sample Output:

```
============================
          Student Information
============================
Name        : natasha
Roll no.    : 250160036
Branch      : SOET
Semester    : 1rst

---------------------------
Subject 1 : nano student.sh
Subject 2 : 30
Subject 3 : 40
Subject 4 : 50
Subject 5 : 60
============================
UBUNTU@Natashaa:~$
```
